METHD CUSTOM RANGE  
FROM MARK TAYLOR DESIGN

Mark Taylor Design, the prestigious British manufacturer of superlative bespoke furniture for over 20 years has launched MeThD, a unique custom kitchen experience, designed to offer:

- ◆ The quality beauty and aftercare of bespoke.
- ◆ The affordability speed of production and ease of installation of a custom range.

MeThD incorporates Mark Taylor Design's design elements curated to produce 4 custom kitchen ranges and an innovative movable island, all of which are available with a number of bespoke adaptations and in standard or special paint colours. The Fenix Nanotech Matt material finish for example, looks superior, prevents fingerprints and is extremely durable.

As well as ensuring that the designs and prices are accessible, MeThD provides interior designers, homeowners and developers with a fast, reliable and straightforward service. Once you've chosen your aesthetic, range style and design adaptations with our interior design team, our expert kitchen designers will design your kitchen and agree your finishes and final costings with you. We will then manufacture your kitchen and have it ready for delivery just eight weeks after you first commissioned it, ready assembled, with fitting costs and a 12-month aftercare package included for extra peace of mind.

# TRADITIONAL SHAKER - STYLE KITCHEN

Classic kitchens are synonymous with the notion of bespoke design, so it made perfect sense for us to create a timeless kitchen range.

# MODERN HANDLELESS KITCHEN

We designed our new handleless kitchen range with chic and clutter-free living in mind. This carefully curated design with clean lines makes the perfect choice if space is at a premium. Our handleless kitchen consists of beautiful solid doors where finger marks will be a thing of the past. Recessed finger gaps means touch-free door fronts, and for young families, the design makes it harder for young children to open the doors.

# SKINNY SHAKER - STYLE KITCHEN

Our Skinny Shaker-style kitchen features a beautifully modern take on a shaker-style door, with low profile shaker elements creating a spacious and refreshing look. For this kitchen we also designed a bespoke movable island in limed tulipwood.

Bespoke adaptations are available with all our MeThD kitchens.

# CONTEMPORARY FLAT DOOR KITCHEN

This stylish, sleek kitchen range in our new collection allows you to choose cabinet handles or push-to-open latches - the choice is yours. You can create clean lines and a smooth finish with a push-to-open door. However, if you prefer handles, take your pick from bar, knob and decorative options. This way, you can add your own personal touch to create a distinctive and unique kitchen.

# CASE STUDY

A modern kitchen featuring light blue cabinetry and a white subway tile backsplash. The countertop is a mix of white and light wood. A copper faucet is positioned over a sink. A wooden cutting board with tomatoes and an avocado sits on the counter. In the background, there is a white door, a coffee machine on a small island, and a large blue refrigerator. The floor is light wood-look laminate. The text 'CASE STUDY' is overlaid in the center in a bold, black, sans-serif font.

We designed this Overcoat Blue, lay-on door, handled MeThD kitchen for clients who were looking for a flexible, urban-style space with an island. They had requested plenty of space to cook and entertain. However, the couple wanted to create more space when needed either for entertaining larger groups of friends and for teaching yoga. We designed a customized mobile island unit and breakfast bar. It can be wheeled to one side or into the garden as an outdoor island if the weather is fine. We painted the cabinetry with a durable factory finish. MeThD copper door handles complete the look with a stylish 30mm Nuevo Calacatta Quartz worktop. We can also supply in-frame doors if preferred.

We believe movable kitchen islands make perfect sense if you are looking for versatility in your kitchen. This creative design embraces changing needs for space in the hub of the home. Fixed island units tend to have a central location in the kitchen. Choosing the option of a piece of furniture on wheels provides you with ample ways in which to reconfigure your room's layout, meaning your kitchen space can flex to suit your needs.

A mobile island can work just as well if you benefit from a large, open-plan space. You can roll your movable island into place, perhaps in the living area, for serving drinks and nibbles when entertaining.
